

Instruction Manual USB-598 Series

US PATENT 9,713,217

WARNINGS

- Lithium-ion batteries must be used and charged properly. Improper use can result in serious injury, fire, or death.
- NOT FOR USE IN HAZARDOUS LOCATIONS. Do not use this product in explosive atmospheres, near flammable liquids, or where explosion proof or intrinsically safe lighting is required.
- DO NOT use this product in the proximity of vehicles or equipment when there is a risk of flammable liquids coming into contact with the flashlight.
- Light can become hot while on. To prevent damage DO NOT cover or place next to any potentially flammable materials while in use.
- Do not leave the battery in direct sunlight or use or store the battery inside cars in hot weather.
- Do not expose the battery to water or salt water, or allow the battery to get wet.
- Do not store the battery with metallic objects that may cause a short circuit.
- Immediately discontinue use of the battery if the battery emits an unusual smell, feels hot, changes color, changes shape or appears abnormal in any way.
- Keep out of the reach of children.

INITIAL USE

Fully charge the USB-598 before the first use, or if the battery is new or has been unused for several months. The maximum charge time required is approximately 6 hours.

CHARGING THE LIGHT

The USB Charging Port is inside of the rotating sleeve located below the head of the light.

Open Rotating Sleeve

- Expose the USB Charging Port by twisting the sleeve and rotating it to the left.
- Continue rotating the sleeve and slide it downward on the handle.

Plug into USB port to charge

The light ships with a USB-C Charging Cable. It can be charged using any of the following methods:

- USB Port on a computer (NOTE: Charging times vary depending on the computer)
- USB port in vehicles
- USB Vehicle charger for cigarette lighter port (not included)
- USB Compliant AC to DC USB wall charger similar to ones used with most Cell Phones (not included)

The typical charge time is approximately 3 hours. Actual time may vary depending on the remaining charge in the battery and method of charging. Ambient temperature can also effect charging time.

The charge indicator light located directly above the charging port will turn red while the charging and green when fully charged.

Close Rotating Sleeve

- Cover the USB Charging Port by twisting the sleeve and rotating it to the right.
- Continue rotating the sleeve and slide it upward on the handle.

WARNING: When the Rotating Sleeve is open, the light is no longer IP-X7 Waterproof

OPERATION

The USB-598 has seven light modes: momentary flashlight, full brightness flashlight, medium brightness flashlight, low brightness flashlight, floodlight, and dual-light. The light has a tail switch that operates the flashlight and a body switch that operates the floodlight.

Momentary Flashlight Mode

Lightly press the tail switch (without clicking the flashlight on) for momentary operation. Release the switch to turn off.

Constant-on

Fully press the tail switch until it clicks and then release for constant-on in high-brightness mode. Press and release the switch to turn off.

Select Brightness Level

Press and hold down the tail switch. The light will cycle from high to medium to low and back at a rate of approximately one mode per second. The light will continue to cycle through the various modes as long as the switch is held down. When the desired brightness level is reached, release the switch, and the light will remain in that brightness mode. Press and release the switch to turn off.

Floodlight

Press the body switch until it clicks and then release for floodlight mode. Press and release the switch to turn off.

Dual-Light allows the user to turn on both the Flashlight (at any brightness level) and the Floodlight, at the same time. First select the appropriate brightness level of the flashlight using the directions above. Next press and release both switches to activate both the flashlight and floodlight. Press and release to turn off.

CR-123 BATTERY CARRIER

The CR123 battery carrier converts the USB-598 from rechargeable Lithium-ion to non-rechargeable Lithium battery operation.

Load two CR-123 Lithium batteries with the positive terminals pointing in the direction of the arrow. NOTE: The flashlight cannot be charged with the CR-123 CARRIERm installed.

LIMITED LIFETIME WARRANTY

Bayco Products, Inc. warrants this product to be free from defects in workmanship and materials for the original purchaser's lifetime. The Limited Lifetime Warranty includes the LEDs, housing and lenses. Rechargeable batteries, chargers, switches, electronics and included accessories are warranted for a period of two years with proof of purchase. Normal wear and failures which are caused by accidents, misuse, abuse, faulty installation and lightning damage are excluded.

We will repair or replace this product should we determine it to be defective. This is the only warranty, expressed or implied, including any warranty of merchantability or fitness for a particular purpose.

For a complete copy of the warranty, go to www.baycoproducts.com/bayco-product-support/warranties. Retain your receipt for proof of purchase.
